

HEALTHCARE SYSTEM

The medical complex is a public-private partnership project included in the “Health Insurance Fund” system of the State of Israel with the involvement of medical companies Clalit, ELSMED, Genesis Group, focused on further self-financing through the following activities:

- ✓ provision of package of services "diagnostics" (outpatient practice);
- ✓ planned surgical interventions (clinical practice);
- ✓ medical tourism (diagnostics + planned operations).

Approximate investment volume -800 million Euro

How it works:

The patient buys policy anywhere in the world and is registered online.

2. The patient receives a call from the call center of medical complex, agrees on arrival time, reserves "diagnostics" service package for specific time, receives reservation for hotel that suits the patient

3. The patient arrives at the medical complex, undergoes full diagnosis, receives results and detailed treatment recommendations, including operational algorithms for specialists

4. The patient chooses clinic where he will conduct the treatment according to results of received diagnosis. In case of choosing medical complex, it coordinates the time and other details of the treatment.

5. The patient arrives at agreed time for treatment, conducts planned surgical intervention, recovery period, and returns home

Main sources of funding for medical complex:

- ➔ **Diagnostics**
- ➔ **Routine surgery**
- ➔ **Medical tourism**

The main units of medical complex:

1. Consultative and diagnostic center.

The expected throughput of 400-600 patients per day.

The main units of medical complex:

2. Inpatient unit with 250 patient places

including surgical and therapeutic unit

The main units of medical complex:

3. Inpatient children's department with 100 places.

The main units of medical complex:

4. Educational building for 250 people

The main units of medical complex:

5. Residential village for staff of 200 apartments

The main units of medical complex:

6. The hotel complex for patients for 400 - 500 beds

consisting of several hotels of different classes.

The main units of medical complex:

7. Shopping and entertainment center.

Planned equipment:

The estimated location of medical complex

Latvia, European Union

1. Jūrmala - 30 km. from Riga airport
2. Liepāja - 2 km. from Liepāja airport

The advantages of location in Latvia:

- Historical resorts places
- Developed medical structure (clinics and university)
- Low cost of land and labour

Thank You for your time!
